

STāSIS B8-A4 Exhaust

The STāSIS B8 A4 exhaust for the manual 6 speed (MT6) and tiptronic is a direct bolt-in, CNC mandrel bent, T304 stainless steel cat-back system. Our exhaust features a down pipe, mid pipe with resonator, and rear section with a driver and passenger side muffler. Unlike the original equipment manufacturer (OEM) configuration, our exhaust has a single tip on each side of the car, this requires the purchase of a B8 A4 six cylinder rear valence. An S-line 2.0T will require an S-line v-6 valence. The system terminates into STāSIS etched polished tips. This system has been optimized to achieve increases in power and sound while maintaining low levels of cabin resonance at cruising speeds.

“STāSIS is the Latin root for balance. This is our philosophy in everything we design”

System Contents

- (1) STāSIS Cat-Back Exhaust System
- (1) All necessary mounting hardware
- (1) Passenger side heat shield

Supported Audi Vehicles

Model:	A4
Model Years	2009-Present
Engine:	2.0T
Transmission	All
Drivetrain	Quattro

Features

- The STāSIS exhaust system is a direct bolt-in replacement for the OEM exhaust, no welding or fabrication is required.
 - T304 Stainless Steel pipes shaped with CNC mandrel bender to ensure constant pipe radius.
 - Mounted using OEM hangers by utilizing the stock slipjoint at the downpipe connection, and flange connections at the mufflers.
- STāSIS mufflers incorporate reflective (active) and passive technologies.
 - The oval muffler chambers have been extensively developed and tested to minimize exhaust back pressure to the engine. This reduces the undesirable turbo lag, while increasing power output.
 - The STāSIS resonator and mufflers combine to give an exhaust tone which is noticeably deeper and stronger during aggressive throttle input, while maintaining non-intrusive cabin resonance at cruising speeds.

- STāSIS exhaust systems are tested, and held to the highest standards
 - We extensively test our systems in urban, suburban, rural areas, as well as the race track.

	OEM Audi A4 2.0 TFSI	STāSIS
Peak Horsepower	211	220
Peak Horsepower with STāSIS tune	246	261
Pipe Diameter – Downpipe	55mm (2.0")	63.5mm/76mm (2.5"/3")
Pipe Diameter- Divorced Mid-Pipe to Mufflers	50 mm (2.0")	57 mm (2.25")
Complete Assembly Weight	29 kg (63.8 lbs)	27 kg (59.4 lbs)
